

TTANGO STI Point-of-Care Testing Program Report

Month of Issue: April 2024

For more information contact ttango2@flinders.edu.au

Contents

1.	Number of current operational sites in each jurisdiction, Q2 2023 – Q1 2024	2
2.	Cumulative CT/NG/TV POC patient tests over time, Q1 2016 - Q1 2024	3
3.	Overview of STI POC patient testing from Q2 2020 – Q1 2024.....	4
a)	Number of STI POC patient tests per month by age group, Q2 2020 – Q1 2024.....	4
b)	Number of STI POC patient tests per month by state/territory, Q2 2020 – Q1 2024.....	5
c)	Proportion of STI POC patient tests per month by Aboriginal and Torres Strait Islander status, Q2 2020 – Q1 2024	6
d)	Number of STI POC patient tests per month by gender, Q2 2020 – Q1 2024	7
4.	Overview of STI POC patient test positivity for Q3 2022 to Q1 2024.....	8
a)	Overall CT/NG/TV POC test positivity, Q2 2023 – Q1 2024	8
b)	CT/NG/TV POC test positivity by Gender, Q2 2023 – Q1 2024.....	9
c)	CT/NG/TV POC test positivity by Age, Q2 2023 – Q1 2024	10
d)	CT/NG/TV POC test positivity by Remoteness, Q2 2023 – Q1 2024.....	11

TTANGO STI Point-of-Care Testing Program Report

April 2024

1. Number of current operational sites in each jurisdiction, Q2 2023 – Q1 2024

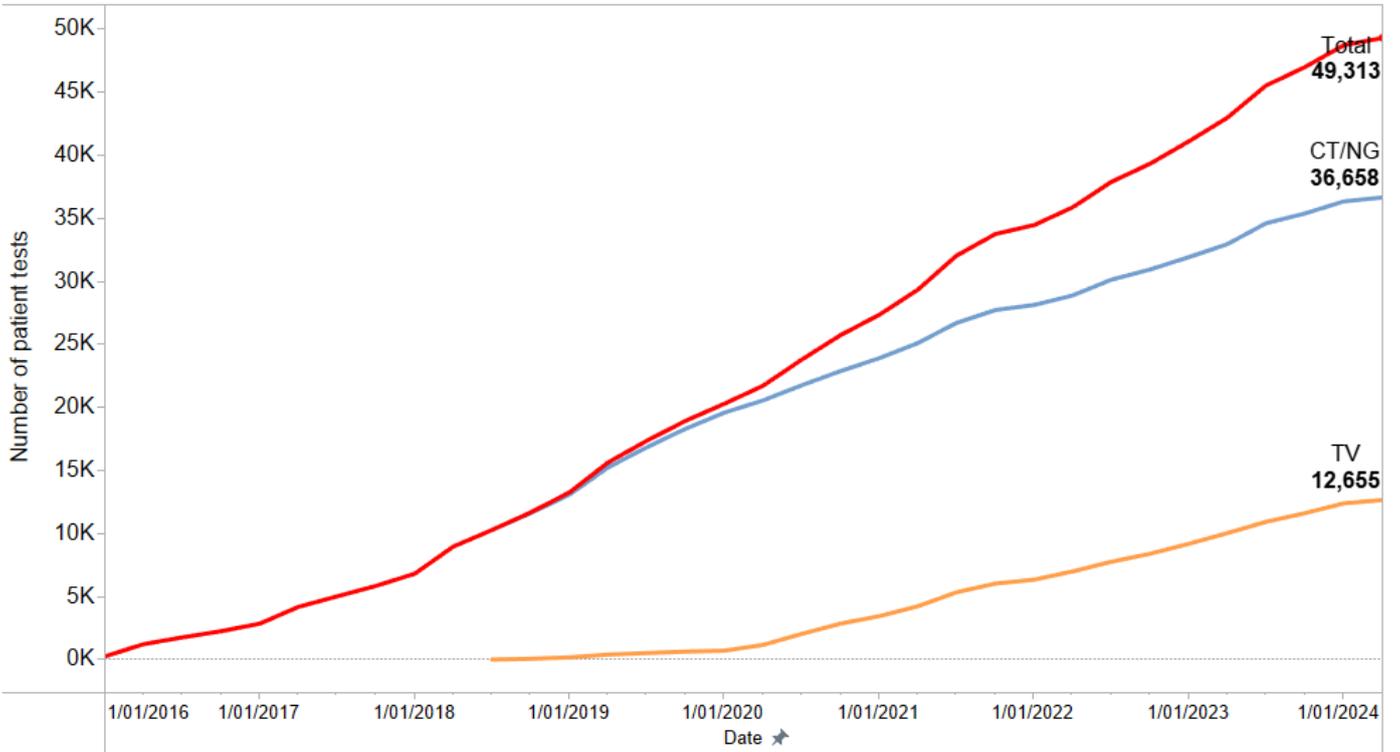

TTANGO STI Point-of-Care Testing Program Report

April 2024

2. Cumulative CT/NG/TV POC patient tests over time, Q1 2016 - Q1 2024

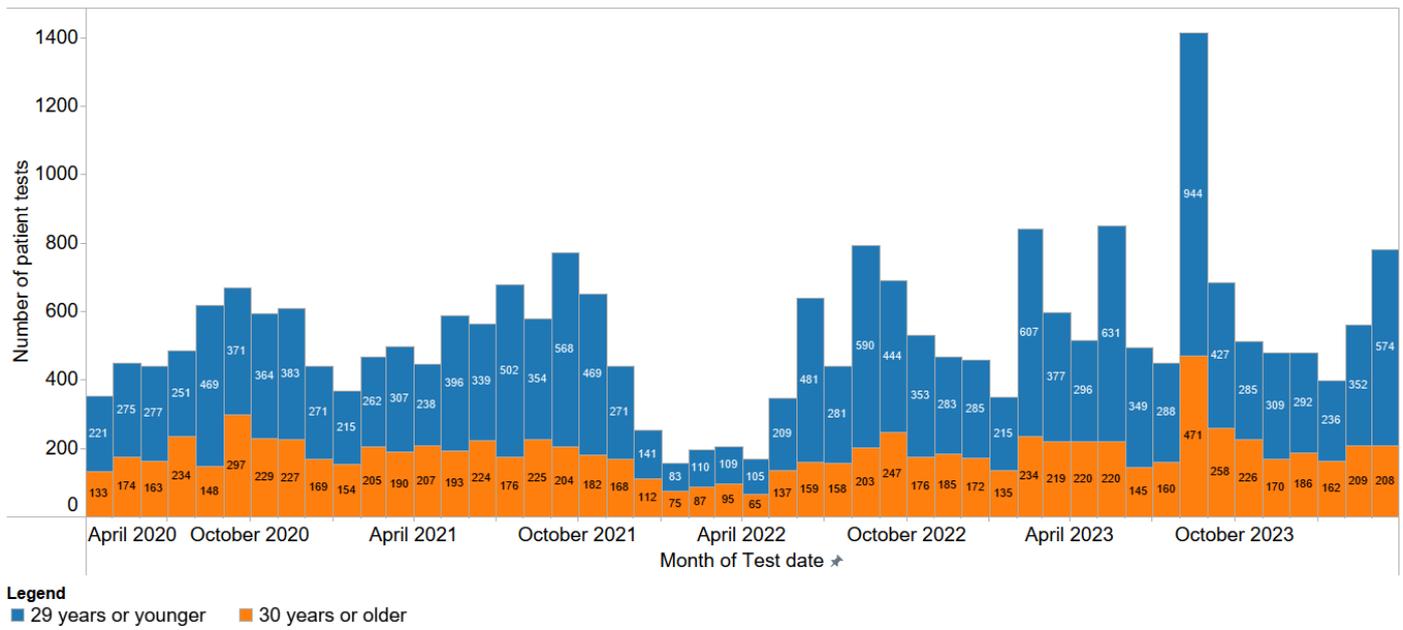

TTANGO STI Point-of-Care Testing Program Report

April 2024

3. Overview of STI POC patient testing from Q2 2020 – Q1 2024

a) Number of STI POC patient tests per month by age group, Q2 2020 – Q1 2024

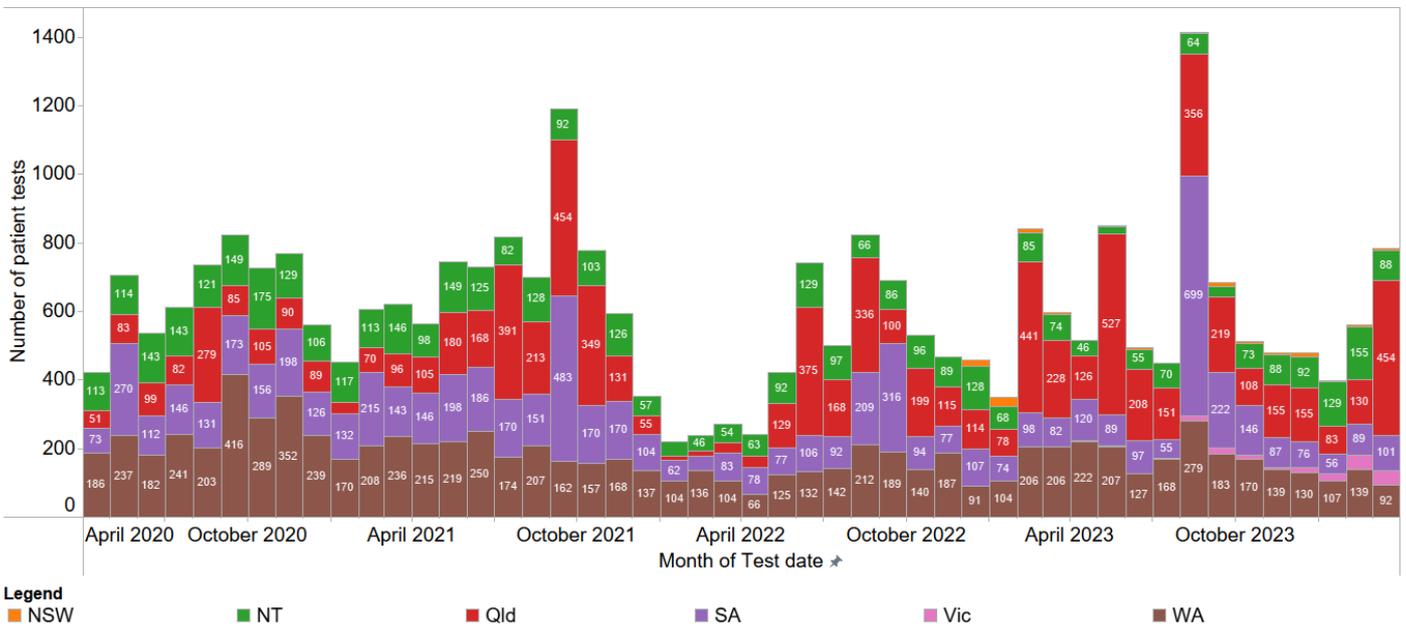

TTANGO STI Point-of-Care Testing Program Report

April 2024

b) Number of STI POC patient tests per month by state/territory, Q2 2020 – Q1 2024

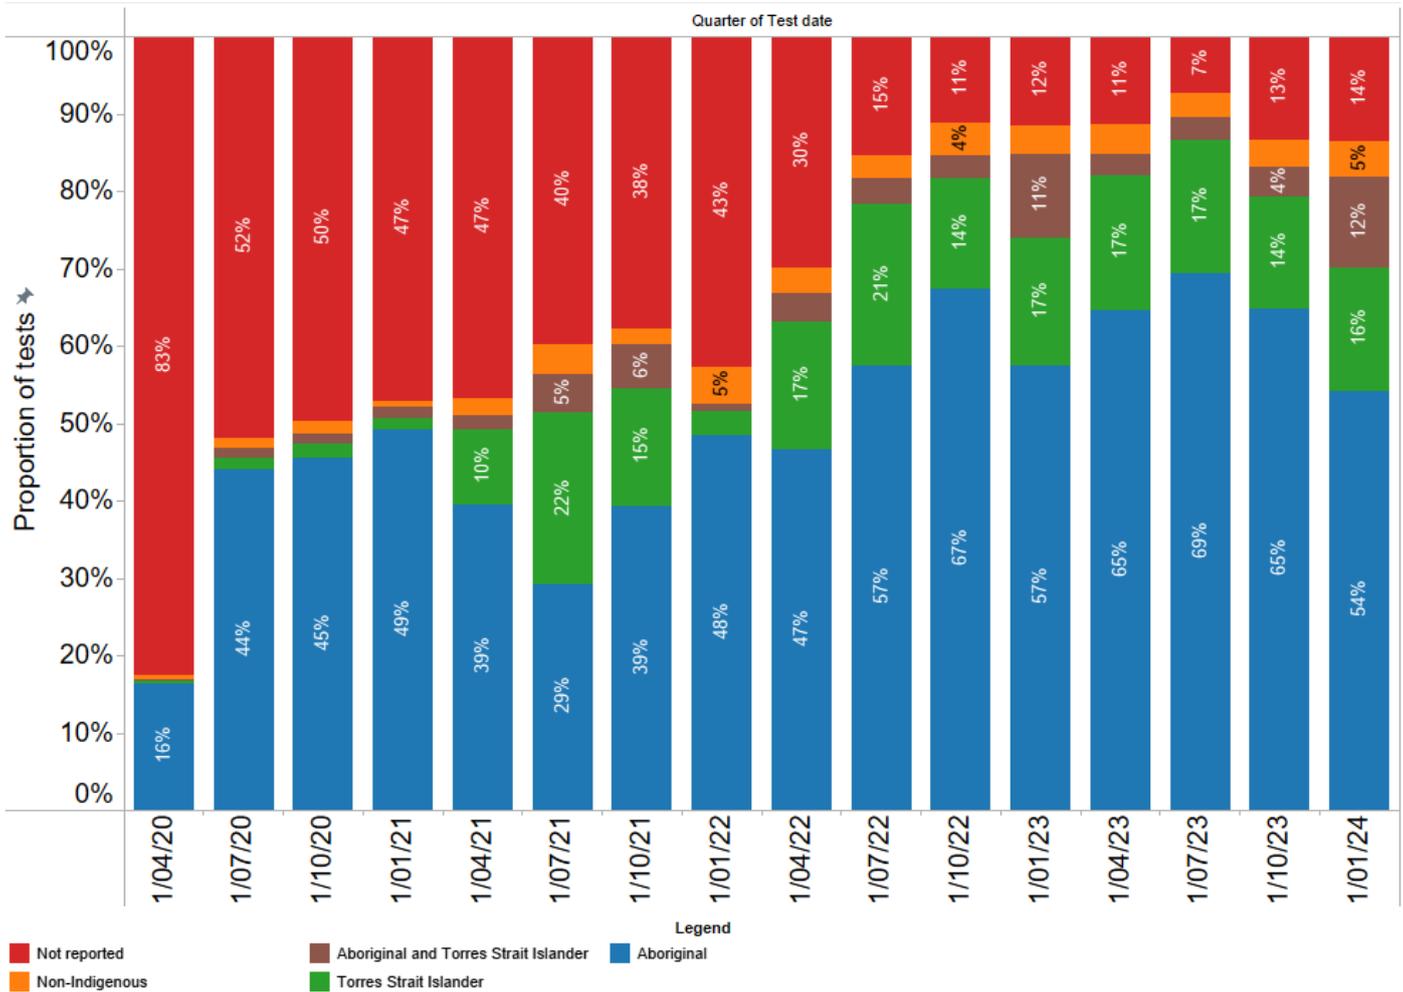

TTANGO STI Point-of-Care Testing Program Report

April 2024

c) Proportion of STI POC patient tests per month by Aboriginal and Torres Strait Islander status, Q2 2020 – Q1 2024

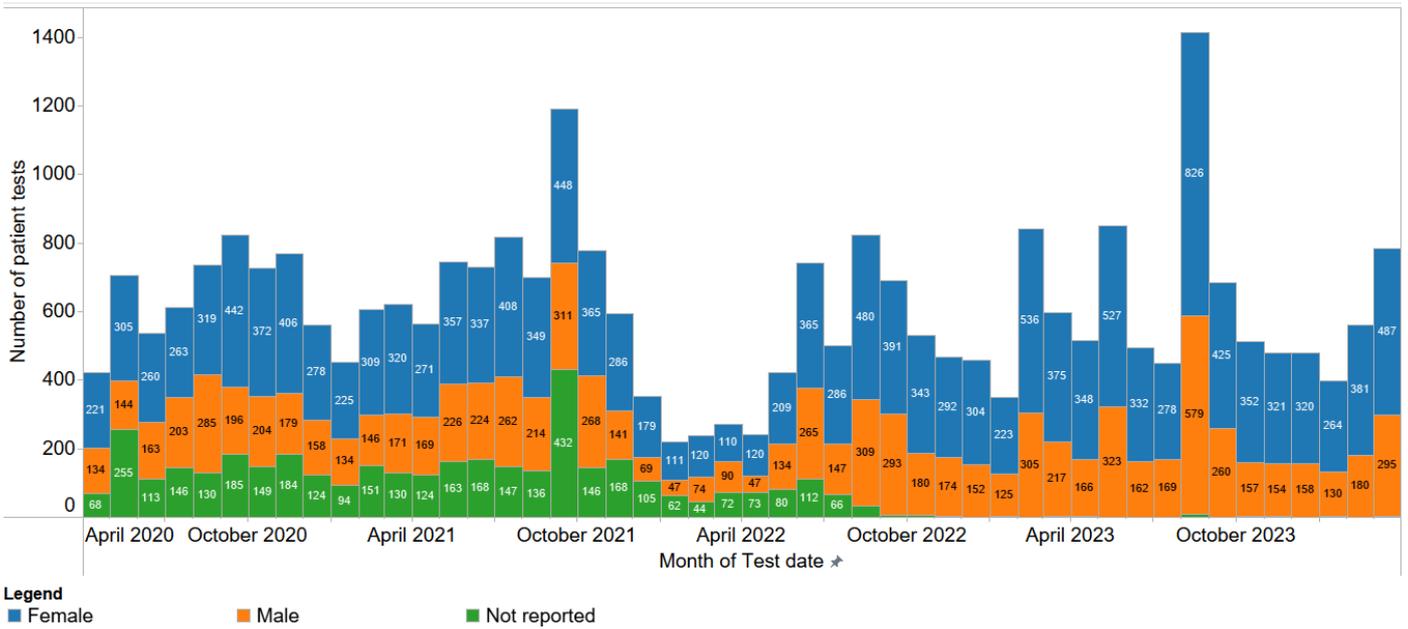

Note: The proportion of not reported has decreased over time following improved data capture across the network.

TTANGO STI Point-of-Care Testing Program Report

April 2024

d) Number of STI POC patient tests per month by gender, Q2 2020 – Q1 2024

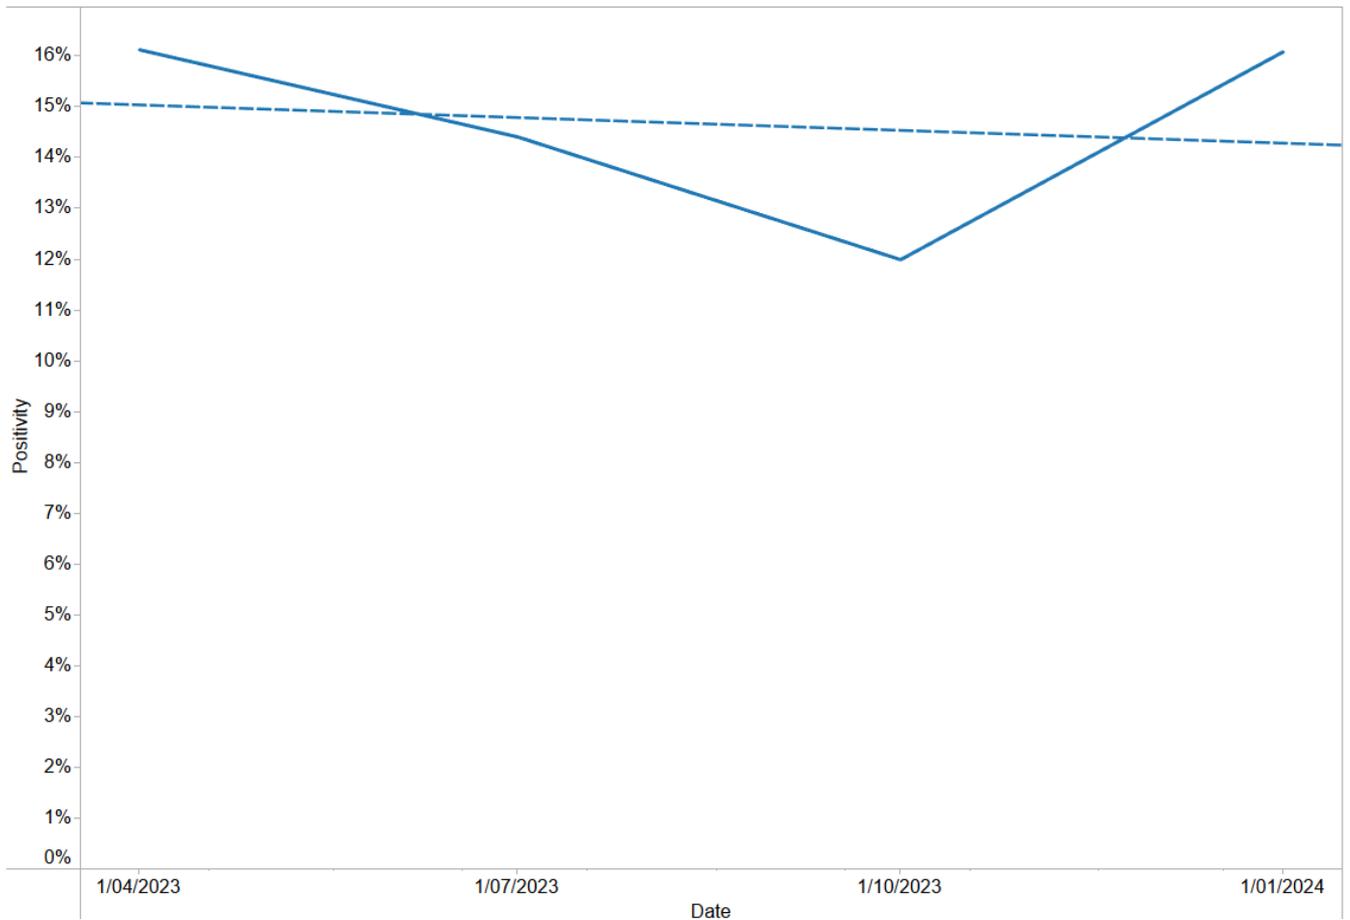

Note: The proportion of *not reported* has decreased over time following improved data capture across the network

4. Overview of STI POC patient test positivity for Q3 2022 to Q1 2024

a) Overall CT/NG/TV POC test positivity, Q2 2023 – Q1 2024

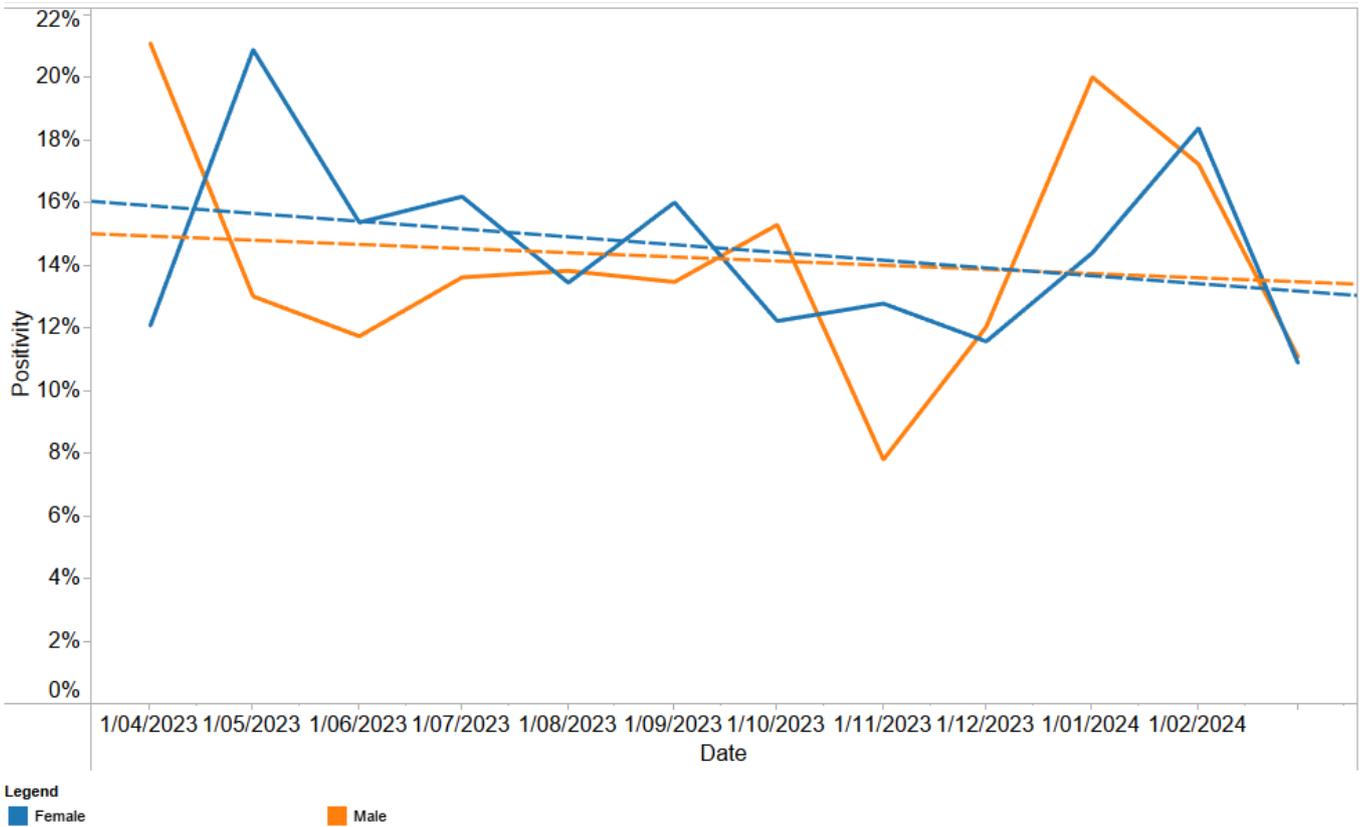

Note: Positivity is the number of positive patient tests divided by the number of patient tests. One CT/NG test is counted as two tests in the denominator. The dotted line represents the trend over time.

TTANGO STI Point-of-Care Testing Program Report

April 2024

b) CT/NG/TV POC test positivity by Gender, Q2 2023 – Q1 2024

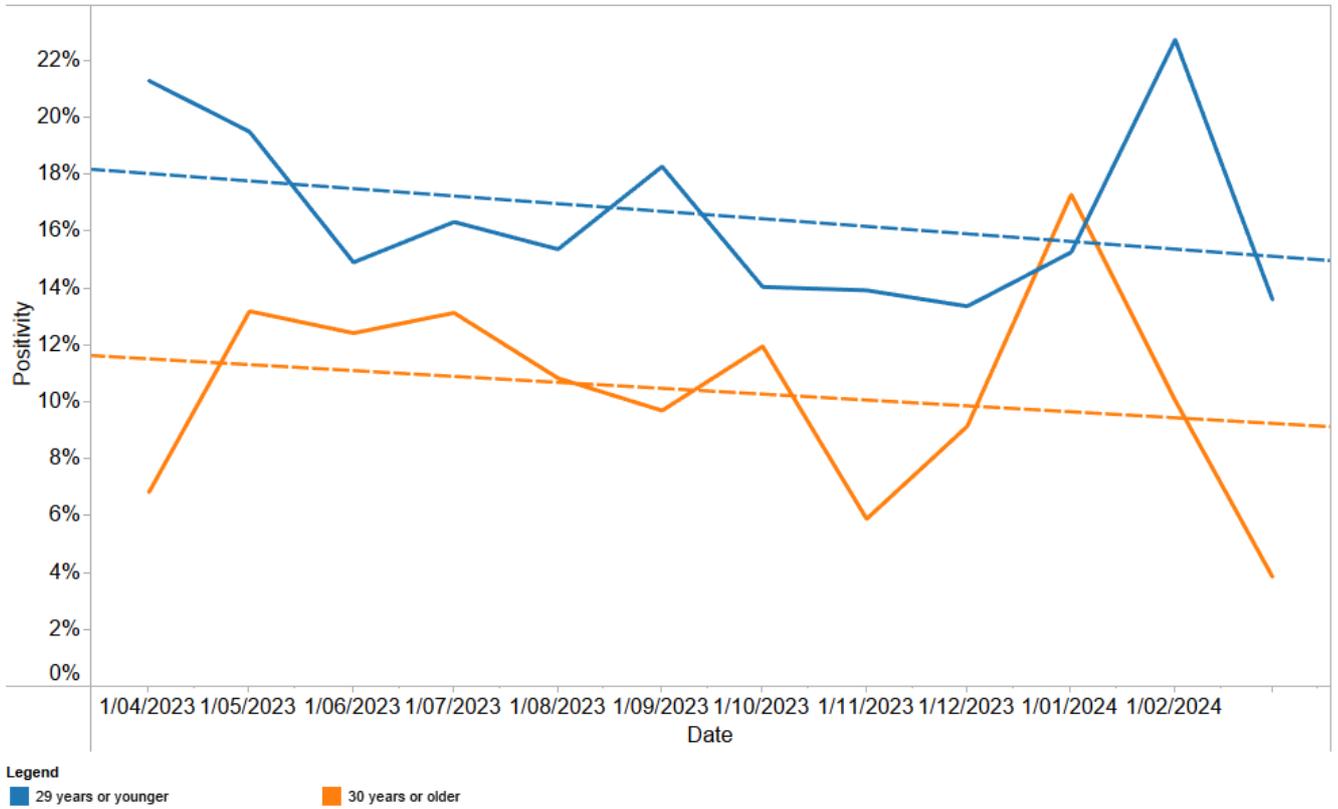

Note: Positivity is the number of positive patient tests divided by the number of patient tests. One CT/NG test is counted as two tests in the denominator. The dotted line represents the trend over time for each respective population group.

TTANGO STI Point-of-Care Testing Program Report

April 2024

c) CT/NG/TV POC test positivity by Age, Q2 2023 – Q1 2024

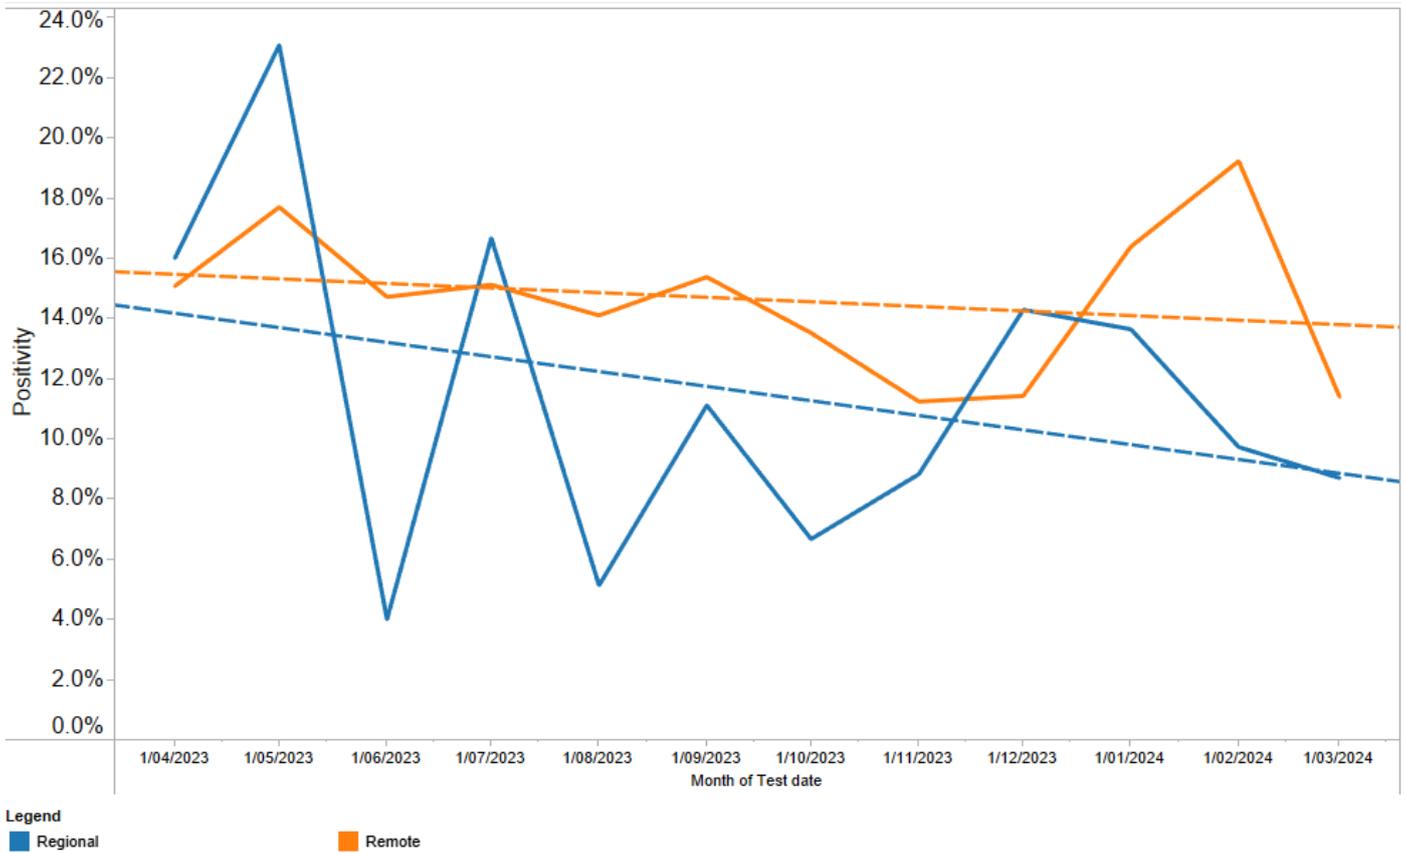

Note: Positivity is the number of positive patient tests divided by the number of patient tests. One CT/NG test is counted as two tests in the denominator. The dotted line represents the trend over time for each respective population group.

TTANGO STI Point-of-Care Testing Program Report

April 2024

d) CT/NG/TV POC test positivity by Remoteness, Q2 2023 – Q1 2024

* Note: Positivity is the number of positive patient tests divided by the number of patient tests. One CT/NG test is counted as two tests in the denominator; variations in positivity over time by remoteness area may be due to increased enrolment in regional areas. The dotted line represents the trend over time for each respective population group.
